Lake Dardanelle is one of a chain of lakes created by the McClellan-Kerr Arkansas River Navigation System. The waters of Lake Dardanelle are surrounded by five counties, which provide vast diversity in habitat. Located along the Mississippi Flyway, this man-made reservoir is an ideal stop off for a variety of migratory birds. These qualities have led to Lake Dardanelle's distinction as an Important Bird Area by the National Audubon Society.

Lake Dardanelle State Park is located on the east end of the lake. Base your search from one of our many campsites located along the water. Be sure to stop at the visitor center to pick up your free State Highway Map and tour the history and wildlife exhibits. Field guides and other nature related items can be purchased at the park gift shop.

The park interpreter can show you some good places to watch for birds on Lake Dardanelle. The Meadow Brook Trail has an observation deck, perfect for watching songbirds. The wooden fishing pier is also a great place to spot birds on the water. In the fall and winter, the interpreters offer lake cruises, providing opportunities to see our many cold weather visitors, such as bald eagles and many species of gulls.

Interpretive staff at the park offer special events and regularly scheduled activities, ranging from eagle cruises to trail walks, designed to please any birder.

We would love to hear about your birding experience around Lake Dardanelle. Report your observations at the park visitor center or e-mail the park at lakedardanelle@arkansas.com.

The following symbols indicate the local status for species on this list:

- C** = Common (almost always found)
- F** = Fairly common (regularly seen, but usually in small numbers)
- U** = Uncommon (difficult to find, but often overlooked)
- R** = Rare (not expected, but reliably reported at least one time)
- *** = Known to nest in the area
- = Not reported this season

- Sp** = Spring (March–May)
- S** = Summer (June–July)
- F** = Fall (August–November)
- W** = Winter (December–February)

Seasons overlap, thus, some birds may arrive earlier and/or stay later than the months indicated.

NOTICE: *To preserve scenic beauty and ecology, fences and warning signs have not been installed in some park locations. Caution and supervision of your children are required while visiting these areas.*

Toward fulfillment of our conservation mission, Arkansas State Parks has printed this brochure on recycled paper using soy ink.
